CWC Toilet Tummy WC Cistern Displacement Device

The Toilet Tummy™ is a durable, low cost, user friendly toilet tank water saver that can be used to tune up water wasting toilets and make them more of a water saving, efficient toilet. The Toilet Tummy™ is the least complex and easiest to install toilet tank water saver. The Toilet Tummy™ is designed to hang on the inside of the toilet tank wall displacing 2.4 litres to 4.8 litres of water per flush. Water is saved because the toilet tank never needs to refill the space occupied by the Toilet Tummy™ with water. It saves 2.4 lt to 4.8lt of water depending upon whether one or two toilet tummies are used. The Toilet Tummy™ is lightweight, easy to install, never needs maintenance, water efficient, water saving, and is a great addition to any water conservation effort.
